

How To Buy Peel-and-Stick Nonskid

Purchasing Peel-and-Stick Nonskid can be a confusing task, especially if you are doing it for the first time. This catalog is intended to introduce you to the available products. And, here are a few tips to help make your purchasing experience a little easier.

- Determine if you want to purchase standard sizes of Peel-and-Stick Nonskid or if you want to purchase a custom designed kit. (If a custom designed kit is not available for the area you are working with then standard sizes will be the option to choose. If you want to inquire about the availability of an area or if you want to have a custom kit designed for an area developed please contact Aaron Porter at 318-635-6471 ext. 209)
- If you are replacing pieces from a custom designed Peel-and-Stick Nonskid kit, please contact LAB to get the individual piece price.
- Determine the amount of Edge Sealer needed. In most cases, Edge Sealer is only required on exterior areas and wet surfaces. Each tube covers approximately 100 linear feet. If needed, we can help you calculate how much you will need.
- If you are working with a porous surface, such as concrete, consider using the Safety-Walk™ Primer to enhance adhesion.
- Some pieces will need to be trimmed to properly fit, especially if you are working with standard sizes versus a custom designed kit. We do have toolkits available to help ease installation. This catalog lists the recommended tools for the different types of installation (Custom Designed Kits, Standard Size Rolls & Pieces, & Repair & Maintenance), and we offer full toolkits for each type. If you have some of these tools already and only require a few, you can purchase the tools individually as well.
- If you are repairing Peel-and-Stick Nonskid, use the Citrus Base Cleaner to help remove any stuck-on residue from old pieces of material.
- You can purchase all items through LAB directly. Some items are available on our website (www.lablind.com), through DoD E-mail and IDIQ. We do prefer to have Purchase Orders sent directly to us whenever possible. You can email orders to labstore@lablind.com or fax them to 888-831-0686.

We are available to answer any questions you have. Please don't hesitate to call or email.
